ARTIFICIAL GRASS/TURF

Safety is of paramount importance when it comes to sports areas. And that is the main reason why sports grounds, fields, and pitches have been surfaced with materials like tarmac and real grass. Even though it is fantastic on the first peek, the real grass has some potential consequences. It leads to tripping, falls, and injury. Moreover, the maintenance part will be hard as it needs frequent watering and caring, which is hard in the Middle East region.

It is mandatory that your playground should look visually appealing for both kids (to play) and parents (to let the kids play). The natural wooden play equipment will complement the landscape, giving an enticing visual appearance. They will fit perfectly into a natural area with sand, wood chips, rocks, and trails. However, it is better to keep a natural theme for the kid's playground area, so that the children can fully involve themselves in the surroundings.
